

## Problem Statement:

## Goal:

A plasma donar has to be very intuitive for the needees so that they can find a donar for their medical needs.

The plasma donar application where the documents are maintain in the database.

## Problem:

The current problem is to find a plasma donar manually in the world. It may have some agency to find some donar for the needs it may expensive to find the donar.

## Solution:

The purpose of the plasma donar application is to connect both the donar and the receiver without any interpreter. And to find the correct donar at the right time.
